

**PPS** | POWER PLANT  
SERVICES

## Main Turbine Valve Overhauls

Valve parts and assemblies have historically high maintenance schedules, it is imperative they are serviced properly to prevent forced outages and to keep the unit on-line. Power Plant Services helps you keep a timely maintenance schedule on all valve services.

With vast amounts of raw material in stock, 75 machines, and the experienced manpower needed, PPS can repair and manufacture all valve parts and assemblies from different OEMs.

If your valve or valve assembly is extensively used or damaged beyond repair, our reverse engineering team can re-engineer a new part to the original design intent. Our team utilizes state-of-the-art 3D laser scanners and GOM 3D Structured light scanners to achieve the customer's request.

### Valve Type

- Control Valve
- Inlet Valve
- Main Stop Valve
- Equalizer Valve
- Intercept Valve
- Blow-down Valve
- Governor Valve
- Ventilator Valve
- Throttle Valve
- Combined Control Stop Valve
- Combined Reheat Stop Valve
